

13-15 Sep 2010

33th NySMAC

National Institute of Polar Research Activity in Ny-Ålesund

In the period from April to August 2010

12 Japanese scientists of 3 projects carried out in Ny-Ålesund, 225 man-day.

1. Atmospheric science

2 researchers, 27 May - 3 June

Project name: An observational study on radiative and microphysical properties of mixed phase clouds in the Arctic (RIS ID: 3832)

2. Terrestrial biology

8 researchers, 12 July - 30 August

Project name: Response of high Arctic tundra ecosystem to climate change (RIS ID: 3156)

3. Terrestrial biology

2 researchers, 2 - 19 August

Project name: Climate warming effects on moss pathogenic soil borne pathogens (RIS ID: 3958)

After September 2010 –

1. Atmospheric science

1 researcher, 27 - 30 September

Project name: An observational study on radiative and microphysical properties of mixed phase clouds in the Arctic (RIS ID: 3832)

2. Atmospheric science

3-6 researchers, late December 2010 - March 2011

Project name: Observation of Polar Stratospheric Clouds (PSC) with Fourier-transform infrared (FTIR) spectrometer (RIS ID: 3158)

2nd International Symposium on the Arctic Research (ISAR-2)

Date: 7-9 December 2010

Venue: Hitotsubashi Memorial Hall
Tokyo 101-0003, JAPAN

The abstract deadline is 24 September

About 90 person have already registered.

Please encourage your colleagues
and friends to participate in the
Symposium.
